During this period, Salman Khan and other members of the Khan family were frequently seen visiting the hospital. Many people from the film industry also came to check on his health. Arbaaz Khan recently shared that his father was 'better and improving'.

Close friend and longtime collaborator Javed Akhtar also said that Salim Khan was recovering well and had started sitting and talking again. Aamir Khan had visited the hospital earlier and said the family was hopeful and positive about his recovery.

What Happened To Salim Khan?

Salim Khan was admitted to the hospital after suffering a minor brain haemorrhage in February. Due to his age and the nature of the condition, doctors decided to keep him under strict observation in the ICU.

A brain haemorrhage can be serious, but in his case, it was described as minor, and timely medical care helped control the situation. Over the weeks, his health kept improving with proper treatment and rest.

At one point, the hospital had shared updates about his health, but later stopped doing so after the family requested privacy. Reports suggested that the family preferred to keep medical details limited and away from public discussion.

Now that he has been discharged, Salim Khan is
